

Publications (selected)

- Gabriel W. (1982): Modelling reproductive strategies of *Daphnia*. - Arch. Hydrobiol. 95: 69 80.
- Lynch M. and Gabriel W. (1983): Phenotypic evolution and parthenogenesis. - American Naturalist 122: 745 764.
- Lampert W. and Gabriel W.(1984): Tracer kinetics in *Daphnia*: an improved two compartment model and experimental test. - Arch. Hydrobiol. 100: 1 20.
- Gabriel W. and Lampert W. (1985): Can cannibalism be advantageous in cyclopoids? A mathematical model. - Verh. Internat. Verein. Limnol. 22: 3164 3168.
- Taylor B. E. and Gabriel W. (1985): Reproductive strategies of two similar *Daphnia* species. - Verh. Internat. Verein. Limnol. 22: 3047 3050.
- Gabriel W. (1985): Overcoming food limitation by cannibalism : A model study on cyclopoids. - In: W. Lampert (Ed.): Food limitation and the structure of zooplankton communities. - Arch. Hydrobiol. Beih. Ergebn. Limnol. 21: 373 381.
- Gabriel W. (1985): Simulation komplexer Populationsdynamik. - In: D. P. F. Möller (ed.): Simulationstechnik. Informatik Fachberichte Bd. 109. pp 318 324, Springer, Berlin Heidelberg New York Tokyo.
- Lynch M. and Gabriel W. (1987): Environmental tolerance. - American Naturalist 129: 283 303.
- Gabriel W. (1987): The use of computer simulation to evaluate the testability of a new fitness concept. - In: D. P. F. Möller (ed.): Systems Analysis of Biological Processes. Advances in Systems Analysis, Vol. 2. pp 82 88. Vieweg, Braunschweig.
- Lynch M. and Gabriel W. (1987): Evolution of the breadth of biochemical adaptation. - In: P. Calow (Ed.): Evolutionary Physiological Ecology. pp 67 83. Cambridge University Press, Cambridge.
- Gabriel W., Taylor B. E., and Kirsch Prokosch S. (1987): Cladoceran birth and death rate estimation: experimental comparisons of egg ratio models. - Freshwater Biology 18: 361 372.
- Gabriel W. (1988): Quantitative genetic models for parthenogenetic species. - In: G. de Jong (ed.): Population genetics and evolution. pp 73 82. Springer, Heidelberg.
- Gabriel W. and Wagner G. P. (1988): Parthenogenetic populations can remain stable in spite of high mutation rate and random drift. - Naturwissenschaften 75: 204 205.
- Gabriel W. and Thomas B. (1988): The influence of food availability, predation risk, and metabolic costs on the evolutionary stability of diel vertical migration in zooplankton. - Verh. Internat. Verein. Limnol. 23: 807-811.
- Gabriel W. and Thomas B. (1988): Vertical migration of zooplankton as an evolutionarily stable strategy. - American Naturalist 132: 199-216.
- Gabriel W. and Thomas B. (1988): Ultimate causes of vertical migration in zooplankton: An evaluation by evolutionary game theory. - In: Wolff, Soeder and Drepper (eds.): Ecodynamics, contributions to theoretical ecology. pp 127-134. Springer, Heidelberg.
- Van den Bosch F., de Roos A. M., and Gabriel W. (1988): Cannibalism as a life boat mechanism. - J. Math. Biol. 26: 619-633.
- Thomas B. and Gabriel W. (1989): Interaction analysis and stability concept as a means for understanding complex systems. - In: D. P. F. Möller (ed.): System Analysis of Biomedical Processes. Advances in System Analysis, Vol. 5. pp 166-172. Vieweg, Braunschweig.
- Gabriel W. and Thomas B. (1989): Predictive value of evolutionary game theory for vertical migration in zooplankton. - In: D. P. F. Möller (ed.): System Analysis of

Biomedical Processes. *Advances in System Analysis*, Vol. 5. pp 173-180. Vieweg, Braunschweig.

- Gabriel W. (1990): Vertikalwanderung von Zooplankton als evolutionär stabile Strategie. - In: B. Streit (Ed.): *Evolutionsprozesse im Tierreich*. pp 87-106. Birkhäuser Verlag, Basel.
- Wagner G. P. and Gabriel W. (1990): Quantitative variation in finite parthenogenetic populations: What stops Muller's ratchet in the absence of recombination? - *Evolution* 44: 715-731.
- Lynch M. and Gabriel W. (1990): Mutation load and survival of small populations. - *Evolution* 44: 1725-1737.
- Gabriel W., Bürger R., and Lynch M. (1991): Population extinction by mutational load and demographic stochasticity. - In: A. Seitz and V. Loeschcke (Eds.): *Species Conservation: a Population Biological Approach*. pp 49-59. Birkhäuser, Basel.
- Gabriel W. and van den Bosch F. (1991): Consequences of intraspecific predation: A stage structured population model approach. - In: D. P. F. Möller and O. Richter (Eds.), *Analyse dynamischer Systeme in Medizin, Biologie und Ökologie*. Informatik-Fachberichte 275, pp 177-184, Springer Berlin.
- Gabriel W. and Taylor B. (1991): Optimal resource allocation in cladocerans. - *Verh. Internat. Verein. Limnol.* 24: 2784-2787.
- van den Bosch F. and Gabriel W. (1991): The impact of cannibalism on the population dynamics of cyclopoid copepods. - *Verh. Internat. Verein. Limnol.* 24: 2848-2850.
- Lynch M., Gabriel W., and Wood A. M. (1991): Adaptive and demographic responses of plankton populations to environmental change. - *Limnol. Oceanogr.* 36: 1301-1312.
- Gabriel W. and Lynch M. (1992): The selective advantage of reaction norms for environmental tolerance. - *J. evol. Biol.* 5: 41-59.
- Gabriel W. and Bürger R. (1992): Survival of small populations under demographic stochasticity. - *Theor. Pop. Biol.* 41: 44-71.
- Taylor B. E. and Gabriel W. (1992): To grow or not to grow: optimal resource allocation for *Daphnia*. - *American Naturalist* 139: 248-266.
- Gabriel W. and Bürger R. (1992): Aussterberisiko kleiner Populationen: Markov-Ketten und Monte-Carlo-Simulation als komplementäre Ansätze. - In: D.P.F. Möller and O. Richter (Eds.), *Fortschritte der Simulation in Medizin, Biologie und Ökologie*. Informatik-Bericht 92/6, pp 118-120, TU Clausthal.
- Lampert W., Gabriel W., and Rothhaupt K.-O. (1992): Ecophysiological models: A tool for understanding interactions in freshwater communities? - *Verh. Dtsch. Zool. Ges.* 85.2: 95-110.
- Gabriel W. (1993): Models on diel vertical migration. - In: J. Ringelberg (Ed.): *Diel Vertical Migration of Zooplankton*. - *Arch. Hydrobiol. Beih. Ergebn. Limnol.* 39: 123-136.
- Gabriel W. (1993): Technologically modified genes in natural populations: some sceptical remarks on risk assessment from the view of population genetics. - In: K. Wöhrmann and J. Tomiuk (eds.), *Transgenic organisms. Risk assessment of deliberate release*. pp 109-116. Birkhäuser, Basel.
- Gabriel W. (1993): *Modelling approaches to evolutionary ecology*. - Habilitation, Universität Basel.
- Taylor B. and Gabriel W. (1993): Optimal adult growth of *Daphnia* in a seasonal environment. - *Functional Ecology* 7: 513-521.
- Gabriel W., Lynch M., and Bürger R. (1993): Muller's ratchet and mutational meltdowns. - *Evolution* 47:1744-1757. (issued June 1994)
- Lynch M., Bürger R., Butcher D., and Gabriel W. (1993): The mutational meltdown in asexual populations. - *Journal of Heredity* 84: 339-344.

- van den Bosch F. and Gabriel W. (1994): Growth and development in copepods. - *Limnology and Oceanography* 39(7): 1528-1542.
- Gabriel W. and Bürger R. (1994): "Extinction risk by mutational meltdown: synergistic effects between population regulation and genetic drift." In: V. Loeschcke, J. Tomuik and S.K. Jain (Eds.) "Conservation Genetics", pp 69-84, Birkhäuser, Basel.
- Matveev V. and Gabriel W. (1994): Competitive exclusion in Cladocera through elevated mortality of adults. - *J. Plankton Res.* 16: 1084-1094.
- Gabriel W. (1994): "Mutational Meltdown": Aussterberisiko durch Anhäufung schädlicher Mutationen. - *Z. Ökologie und Naturschutz* 3: 161-165.
- Gabriel W. (1996): Obituary (Jürgen Jacobs). - *J. evol. Biol.* 9:1-4.
- van den Bosch F. and Gabriel W. (1997): Cannibalism in an age-structured predator-prey system. - *Bulletin of Mathematical Biology.* 59: 551-567
- Gabriel W. (1998): Drift. - In: P. Calow (ed.) *The Encyclopedia of Ecology and Environmental Management.* p. 204. Blackwell, Oxford.
- Gabriel W. (1998): Environmental tolerance. - In: P. Calow (ed.) *The Encyclopedia of Ecology and Environmental Management.* pp. 243-244. Blackwell, Oxford.
- Boriss H. and Gabriel W. (1998): Vertical migration in *Daphnia*: the role of phenotypic plasticity in the migration pattern for competing clones of species. *Oikos* 83: 129-138.
- Gabriel W. (1999): Evolution of reversible plastic responses: inducible defenses and environmental tolerance. – pp 286-305. In: R. Tollrian and C.D. Harvell (Eds.) *The Ecology and Evolution of Inducible Defenses.* Princeton University Press.
- Nürnberger B. and Gabriel W. (1999): Continued hope for a general explanation of sex. *J. evol. Biol.* 12: 1040-1042.
